RTKL UK Office, London: Lead LEED AP for Dalen Strategies to provide consultancy services and advice for LEED-Commercial Interiors (CI) 2009 assessment for the office floors being developed by architects RTKL in London. The office area is approximately 10403 sq.ft. located on the 10th floor. Typical services included undertaking LEED pre-assessments, design team workshops, monitoring and review of the design and construction stage documents, site visits, technical queries and issue of the report to USGBC for certification. The building has achieved LEED 'Certified' as of July 2015.

Catlin Shared Services Europe, Wroclaw, Poland: Lead LEED AP for Dalen Strategies to provide consultancy services and advice for LEED-Commercial Interiors (CI) 2009 assessment for the office floors being developed by Catlin Group in Wroclaw, Poland. The office area is approximately 19300 sq.ft., and split on two floors located in a listed building of the historic city centre. Typical services included undertaking LEED pre-assessments, design team workshops, monitoring and review of the design and construction stage documents, site visits, technical queries and issue of the report to USGBC for certification. The building is expected to achieve LEED Silver rating.

Heart of Doha - Msheireb Downtown Doha Phase III, With Atelier Ten: Msheireb Properties' are undertaking regeneration and preservation of the historical downtown of Doha. The project aims to revive the old commercial heart of the city through a new architectural language based on community living, over 31-hectare site. The project blends traditional with the modern technology to focus on sustainability and harmony with the environment. The mixed-use development will comprise more than 100 buildings, with a combination of commercial and residential properties, retail, cultural and entertainment areas over 8 phases. Atelier Ten provide mechanical, environmental and LEED services for Phase 3, which is a large mixed-use city quarter comprising fourteen buildings including apartments, shops, restaurants, offices, two health clubs and a 180-bedroom hotel. Consultancy services as a LEED AP include undertaking LEED pre-assessments, design team workshops, monitoring and review of the design and construction stage documents, technical queries to USGBC prior to certification. In total Phase 3 included 11 different LEED New Construction and Core & Shell 2009 assessments for residential, commercial, hotel and mosque building types. The buildings are expected to achieve Gold ratings, as a minimum.

Bombardier Aerospace - C Series Aircraft Wing Manufacturing Factory, Belfast: Lead LEED AP and consultant on the project for AECOM (previously known as URS and Scott Wilson) to provide LEED consultancy services and advice on LEED-New Construction 2009 assessment for the Bombardier Factory being developed at George Best Belfast City Airport. The completed C Series Building will be 52,000s.f. in size being built for the production of wings for the new Bombardier C Series plane; the project is split into 3 phases. Services included undertaking LEED pre-assessments, design team workshops, monitoring and review of the design and construction stage documents, site visits, technical queries and issue of the report to USGBC for certification. The building is expected to achieve Platinum rating.
